PROFESSIONAL SUMMARY

Full Stack Developer specializing in the MERN stack with experience building full-stack web applications through hands-on projects. Skilled in developing REST APIs, implementing authentication and authorization, integrating databases, and building responsive React applications. Strong interest in backend development and continuously learning modern web development practices.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, C++, SQL

Frontend: React.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication & Middleware

Database: MySQL, MongoDB, Mongoose

Core CS: DSA, OOP, DBMS, OS

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Render

AI-Assisted Development: ChatGPT, GitHub Copilot

PROJECTS

Vaultix - Full Stack banking System | [GitHub](#) *React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT, Bcrypt, Nodemailer*

- Built a full-stack banking system simulating real-world financial workflows.
- Designed a ledger-based **transaction system** to calculate account balances without storing mutable balance fields.
- Implemented JWT authentication, role-based authorization, and secure cookies
- Developed transaction system with **idempotency validation** and pending state handling
- Integrated Nodemailer for email notifications (registration & transaction alerts)
- Used MongoDB transactions and aggregation pipelines for data consistency

Hirely - Full Stack Job Portal App | [GitHub](#) *MongoDB, Express.js, React.js, Node.js, JWT, Bcrypt, Redux Toolkit, Tailwind CSS*

- Developed a full-stack job portal supporting separate candidate and recruiter workflows.
- Built RESTful APIs for authentication, job posting, applications, and company management.
- Implemented JWT-based authentication with protected routes and role-based access control.
- Deployed frontend on Vercel and backend on Render, configuring environment variables and handling cross-origin requests between services.

ShowTimeHub - Movie Discovery Platform | [GitHub](#) *React.js, Tailwind CSS, React Router, TMDB API*

- Built a responsive movie discovery platform using the TMDB API for real-time search and recommendations.
- Built responsive UI using React.js and Tailwind CSS.
- Improved performance with debounced search reducing API calls by ~60%.
- Managed UI state using Context API and React Router.

EDUCATION

Bachelor of Computer Applications (BCA)

Indira Gandhi National Open University (IGNOU), Delhi
2023-2026
